

## Dividers and Connectors Prioritization Worksheet

- This worksheet help you connect the dividers and connectors to project and activity ideas. Identify the dividers and connectors from the different SAVES categories that you prioritized in the Assess Module, and transfer those into the prioritized dividers and prioritized connectors columns.
- What are ideas to decrease/prevent the prioritized dividers and ideas to increase/support the prioritized connectors? These inform your project/activity ideas, or the "how." In this column, summarize the "who?, what?, where?, when?, and why?" for each activity idea.
- The Options columns of the framework are where you record your options for minimizing harm and maximizing connectors and conflict mitigation for each activity. This exercise helps in improving the design of activities.

CONTEXT				
OPTIONS For minimizing harm	PRIORITIZED DIVIDERS	PROJECT/ ACTIVITY IDEAS	PRIORITIZED CONNECTORS	OPTIONS For maximizing conflict mitigation and connectors
